

# Closed Domain Question Answering with LLMs

## Background

The following prompt tests an LLM's capabilities to answer closed-domain questions which involves answering questions belonging a specific topic or domain.

Note that due to the challenging nature of the task, LLMs are likely to hallucinate when they have no knowledge regarding the question.

## Prompt

Patient's facts:

- 20 year old female
- with a history of anergia nervosa and depression
- blood pressure 100/50, pulse 50, height 5'5''
- referred by her nutritionist but is in denial of her illness
- reports eating fine but is severely underweight

Please rewrite the data above into a medical note, using exclusively the information above.

## Code / API

[GPT-4 \(OpenAI\)](#) [Mixtral MoE 8x7B Instruct \(Fireworks\)](#)

```
from openai import OpenAI
client = OpenAI()

response = client.chat.completions.create(
    model="gpt-4",
    messages=[
        {
            "role": "user",
            "content": "Patient's facts:\n- 20 year old female\n- with a history of anergia nervosa and depression\n- blood pressure 100/50, pulse 50, height 5'5''\n- referred by her nutritionist"
```

```
but is in denial ofher illness\n- reports eating fine but is severely underweight\n\nPlease  
rewrite the data above into a medical note, using exclusively the information above."  
    }  
],  
temperature=1,  
max_tokens=500,  
top_p=1,  
frequency_penalty=0,  
presence_penalty=0  
)
```
